

**Date:** December 19, 2023

**Subject:** California Proposition 65 - Compliant!

Evaluation Screening Report  
No. ETR23C01233M01  
Allwei Technology Co., Ltd.

Remark:

- (1) The chemical screening of specified Proposition 65 list is performed by means of currently available analytical methods against relevant substances for the tested product based on Proposition 65 related documents published by office of Environmental Health Hazard Assessment (OEHHHA):

<https://oehha.ca.gov/proposition-65/proposition-65-list>

These lists are under evaluation by OEHHHA and may subject to change in the future.

- (2) Product and/or BOM review for high-risk material identification and selection of screening test for high-risk chemicals are conducted based on SGS database.
- (3) The screening test of the substances were performance by applicable standard methods and/or SGS In-House method – Analyzed by ICP-OES, GC-MS, UV-VIS, HPLC-DAD, HPLC-MS.
- (4) The evaluation screening is conducted on accessible parts of the product. In case of assessed product would generate heat or air ventilation during use, VOC screening test against the Proposition List is performed at product level based on actual use scenario.

### Details on Evaluation Screening

Unit: mg/kg

Part No.	Part Description	Detected Prop 65 Listed Substance	MDL	Result
1	PCB – Printed Circuit Board	All tested prop 65 substances	-	ND

Note:

1. mg/kg = ppm; 0.1wt% = 0.1% = 1000ppm.
2. MDL = Method Detection Unit.
3. ND = Not Detected = lower than MDL, ND is denoted on the Proposition 65 substance.
4. “ – ” = Not Regulated.
5. Test result that shown as per test group is the actual concentration from laboratory testing. The test result is calculated by minimum sample weight.
